SUMMARY

AI Product Manager with 4+ years of experience in IT/Software, specializing in AI-powered products, Generative AI, and platform development. Currently leading a cross-functional team to ship a Generative AI agent end to end, from product requirements and prompt engineering to knowledge base architecture and launch. Proven track record of owning product roadmaps, leading Agile/Scrum delivery, defining North Star metrics and OKRs, and driving measurable growth in user engagement and conversion through data-driven decision making and strong business-to-technology coordination.

EXPERIENCE

AI Product Manager at DivineAPI, Delhi, India (Remote)

May 2026 – Present

Leading AI product development for customer lifecycle automation and managing a 3-person team of 1 AI engineer and 2 AI-assisted developers.

- **Team Leadership:** Led a 4-person team (1 AI engineer, 2 AI-assisted developers) to design and launch a Generative AI email agent covering 5 customer lifecycle pipelines (Signup, Trial, Win-back, Expansion, Sales Inquiry), owning technical specifications, acceptance criteria, and quality review across the team.
- **AI Architecture:** Designed the knowledge base and server architecture for the AI agent, including the database schema, data ingestion pipeline, and entity relationship model, with a human review process ensuring 100% factual accuracy in prices, plans, and features.
- **Prompt Engineering:** Developed persona-based messaging logic using prompt engineering, generating 60+ personalized emails from 3 reusable prompt documents, with LLM guardrails and a human-in-the-loop approval workflow targeting a 30% win-back reactivation rate.
- **Business Insights:** Built the company's first sales dashboard, consolidating lead, trial, and conversion data into a single funnel view to support founder-level go-to-market (GTM) decisions.
- **Product Documentation:** Authored complete product documentation including the Product Requirements Document (PRD), 5 pipeline build documents, a multi-pipeline CRM build specification, and a knowledge base guide, and delivered an interactive demo simulating 38 end-to-end customer journeys.

Associate Product Manager - AI & Platform at S&P Global, Gurugram

Sep 2024 – Dec 2025

Owned the product roadmap for an AI-powered personalization engine, acting as the primary bridge between business goals and technical development.

- **Product Impact:** Authored comprehensive Product Requirements Documents (PRDs) and structured user stories, driving a 25% increase in user engagement and an 18% reduction in drop-off for an AI personalization engine.
- **Execution Excellence:** Led Agile/Scrum processes as Product Owner, managing a backlog of 30+ user stories and reducing time-to-market by 30% through precise acceptance criteria and cross-functional coordination.
- **Data-Driven Decision Making:** Defined North Star metrics and OKRs (CTR), achieving a 40% improvement in data attribution accuracy through complex API integrations and rigorous data validation.
- **Business Insights:** Developed automated Mixpanel dashboards for funnel analysis, accelerating go-to-market (GTM) decisions by 30% through structured data visualization and informing product strategy.

Senior Product Operations Associate at WNS Global Services, Pune

May 2022 – Jun 2024

Drove product discovery and experimentation initiatives to improve user engagement and conversion.

- **Growth Experimentation:** Managed the A/B testing roadmap and cohort segmentation, boosting MQL conversion by 12% and delivering a 15% ROI uplift.

- **Problem Structuring:** Drove product discovery using user journey mapping and usability testing to identify friction points, increasing user engagement by 18% and optimizing conversion funnels.
- **Data Integrity:** Improved data pipeline accuracy by 135% through rigorous technical validation and structured documentation, ensuring reliable reporting for business planning.

Associate Product Analyst - Customer Experience at Tech Mahindra, Pune Dec 2021 – Apr 2022

Identified and addressed product friction points to enhance customer satisfaction.

- **Operational Efficiency:** Identified technical friction points and redesigned cross-functional workflows, reducing repeat inquiries by 125% and increasing CSAT by 15%.

PROJECTS

Unified Lead Scoring & Global Attribution Engine Sep 2024 – Dec 2025

- **Technical Bridge:** Translated complex ML engineering requirements into clear developer specifications and scalable technical solutions for a global engine across 4 markets.
- **GTM Strategy:** Leveraged SQL and Power BI to analyze trends and drive data-backed OKRs and go-to-market strategies.

General Secretary, Dept. of Geology Aug 2017 – Jul 2020

- Coordinated 15+ guest lectures and field trips, increasing student participation by 30%.

EDUCATION

Fergusson College, Pune — B.Sc. Geology 2020

- 9.8 CGPA

St. Clare School, Nagpur — Class XII (CBSE) 2017

- 9.8 CGPA

SKILLS

AI & Generative AI: Generative AI, LLMs, Prompt Engineering, AI Agents, RAG / Knowledge Base Architecture, LLM Evaluation, Human-in-the-Loop AI, LLM Guardrails, AI/ML Lifecycle, Responsible AI

Product Management: Product Strategy, Roadmap Management, Agile/Scrum, Product-Led Growth, PRD/BRD Writing, User Stories & Acceptance Criteria, Backlog Prioritization, A/B Testing, User Journey Mapping, Go-to-Market (GTM) Execution, OKR Tracking, Stakeholder Management, Team Leadership

Data & Tools: SQL, Python, Power BI, Mixpanel, Funnel Analysis, Data Visualization, API Integration, Database Schema Design, JIRA, Salesforce, Marketo, Figma, Miro (Wireframing)
